IVA DIMITROVA

DEAR MR PETROV,

Firstly I would like to participate in this years' class because it is part of a long process that has started in 2017 when all of us started studying in Plovdiv University or may be even longer ago when we have decided to study and work in the IT industry. In other words when the first step leading to me writing this letter was made.

May be in the beginning everyone has pictured themselves as a big, wealthy entrepreneur working in this purview and earning a lot of money. But in reality starting to enter this world with the help of the university that turns out that is not an easy task. As someone who went through the waitress job then the call centre and now finally part of this industry I want to become successful entrepreneur and help people while builing a solution for upgrading the medical system to a whole new level so everybody can benefit from it and deliver quality applications that can change people's lives.

With regards,
Iva Dimitrova
