

VELIN DIMITROV

DEAR MR.PETROV

I was thrilled to apply for your campaign from the university. I applied to it because I want take the first steps in the path to become a successful entrepreneur. Being a successful entrepreneur means that at some point you will stop being that noisy guy standing behind your desk arguing and waiting for the clock to hit the end of the working day just to get home and tomorrow to come back to work. My goal is to leave a mark in modern history as one of the most successful ones who the people will look up to and bring some inovation to the life of the noisy guy behind the desk. I want to work as a manager of an IT company which focuses on developing a solution for replacing the energy sources of the planet and what is more important to work with people who seek development of themselves everyday.

Warm regards,

Velin Dimitrov
